

The methodology which is employed by MCIC for the purpose of capacity development has been developed and constantly improved for a period of more than 15 years, through practical application. It is based on internationally recognized methodologies and successful practices.

The key characteristics of the methodology are:

- adjustment to the requirements of the beneficiaries
- focus on sustainable solutions
- participation
- transparency
- creating sense of responsibility and ownership
- respect towards the cultural values of the participants

The capacity development is conducted through:

- [Consultations](#)
